Mohammad Ishaqat

Software Engineer · Full-Stack (.NET & Python) · AI Applications

Amman, Jordan | +962 77 628 0800 | Mohammed.az.ishaqat@gmail.com | linkedin.com/in/-mohammad-ishaqat99 | github.com/Mohnogard

SUMMARY

Software engineer building full-stack applications in C# / ASP.NET Core and Python, with industry experience in Germany at Bosch, Pilz and a Munich photonics startup and a .NET internship at Orange Jordan. Strong in object-oriented design, layered architecture and SQL databases. Currently building a RAG-based AI assistant for engineering documentation, combining software development with a mechatronics background.

SKILLS

Languages: Python, C#, SQL, C++, JavaScript, HTML/CSS (Razor, Bootstrap, jQuery)
.NET & backend: ASP.NET Core MVC, Entity Framework Core, LINQ, ASP.NET Core Identity / OAuth, DI, SQL Server, FastAPI
AI & data: LLM API integration, prompt engineering, PDF text extraction, Numpy, Pandas, OpenCV
Design & practices: OOP, interfaces, service/repository layers, Git and GitHub (branches, pull requests)
Embedded & tools: Linux, ROS, Raspberry Pi, Arduino, SPI, CANopen, KiCad, Visual Studio, VS Code
Spoken languages: Arabic (native), English (C2), German (B1)

EXPERIENCE

Orange Jordan — Full-Stack .NET Developer Intern **02/2026 – 06/2026**
C# · ASP.NET Core MVC · EF Core · SQL Server · Git *Amman, Jordan*

- Built database-driven web apps end to end with ASP.NET Core MVC, EF Core and SQL Server, from data model to UI.
- Applied OOP and layered architecture: services behind interfaces, repositories and dependency injection.
- Implemented role-based authentication (ASP.NET Core Identity), Stripe payments and Google/Facebook sign-in; collaborated through Git and GitHub.

Akhetonics GmbH — Electronics Engineer **12/2024 – 07/2025**
Python · C++ · Raspberry Pi · SPI *Munich, Germany*

- Developed embedded control software in Python and C++ for Raspberry Pi and Arduino, including SPI communication with an optical CPU.
- Wrote Python code to control and test precision optical systems; debugged across software and electronics and designed control boards in KiCad.

Robert Bosch GmbH — Bachelor Thesis **10/2023 – 02/2024**
Thesis: Polychromatic Flying Spot Projector *Stuttgart, Germany*

- Developed Python tools to process, visualize and validate optical measurement data that guided design decisions.
- Designed and led development of a polychromatic optical testing system for automated material characterization.

Pilz GmbH & Co. KG — Robotics Intern **06/2023 – 09/2023**
Python · ROS · Linux · CANopen *Stuttgart, Germany*

- Led development of an AGV for industrial safety testing: autonomous control software in Python with ROS on Linux, hardware integration and CANopen communication.

PROJECTS

EngiMind — AI Assistant for Engineering Documentation (in progress) **2026**
Python · FastAPI · LLM API (Claude) · pypdf | github.com/Mohnogard/EngiMind

- Building a retrieval-augmented generation (RAG) assistant that answers technical questions over engineering documents such as datasheets and manuals, with source citations.
- Currently adding retrieval-augmented generation (chunking, embeddings and vector search) to scale to multiple and larger documents, with source citations.

PharmaSkincare — E-Commerce Platform with Admin Back Office **2026**
ASP.NET Core MVC · C# · EF Core · SQL Server · Identity · Stripe | github.com/Mohnogard/PharmaSkincare

- Designed a layered architecture with 9 service classes behind interfaces and a generic repository, and modeled catalog, order and inventory data with EF Core code-first migrations.
- Implemented role-based access with ASP.NET Core Identity and OAuth, Stripe checkout, and an admin back office with activity logging, Excel export and email notifications.

NexusGear — Gaming Equipment E-Commerce (team of 2) **2026**
ASP.NET Core MVC · C# · EF Core · SQL Server · Stripe | github.com/Mohnogard/EcommerceNexusGear

- Implemented the Stripe payment flow and cart/wishlist JSON endpoints with server-side stock validation, consumed via AJAX; collaborated through Git and GitHub.

EDUCATION

BSc Mechatronics Engineering — German Jordanian University (GJU) **2017 – 2024**
Exchange at THWS Würzburg-Schweinfurt, Germany (2022 – 2024) *Madaba, Jordan*
